

Privacy Notice- Community Budgets and Families with Complex Needs

Tameside Council supports the Government's Community Budgets initiative for Families with Complex Needs. This aims to support families struggling to cope and will encourage them to play a stable role in their own communities.

The Council will be identifying those families with the most pressing and complex needs. This will involve some sharing of information between council departments and with other organisations. Any such sharing will be done proportionately and lawfully for the purpose of identifying those families who most need this support. It will be done to ensure that services are better coordinated and focused for those families.

Further information on Community Budgets and Families with Complex Needs can be found at
